

M601E lease engine available for South America

Dear L410 Owners and Operators,

GE Aviation BGA Turboprops is happy to announce the availability of a rental M601E engine for South America in case you require maintenance on your own engine and are sending it to GE's Designated Repair Center, Premier Turbines, for trouble shooting or heavy repairs, such as prop strikes, general mid-time, FOD incidents.

Based on your feedback via our customer satisfaction surveys, GE and Premier Turbines have responded to the needs of its clients and established this engine to alleviate immediate support in AOG situations while your engine is under repair at Premier Turbines. This engine is not intended for use during engine overhaul at the GEAC factory in Prague. Please plan your overhauls accordingly as a lease engine will not be available for support during overhaul.

Up to date key contacts are available on [GE Aviation Czech's homepage](http://www.geaviation.cz), at www.geaviation.cz, they are:

Premier Turbines, DRC:

Mr. Jason Giebler
